SUBJECT INDEX

VOLUME 46 (1977)

Aberrations, chromosomal, in hamster embryonic cells, treated with potassium dichromate, 87
 —, —, monitoring of human populations in connection with environmental pollution, abstract, 201
 —, frequency, influence of mode of administration on, of mouse bone marrow cells, abstract, 242
 —, monitoring of, by screening of multiple malformations, abstract, 231
 —, produced in vivo by chemicals, abstract, 216
 —, and significance of genetic aspects of dose — effect relationships, abstract, 197
 Abnormalities, chromosomal, induced by inhalational anaesthetics, 177
N-Acetoxy-*N*-2-acetylaminofluorene, adducts, removal of, and pyrimidine dimers, from DNA of cells, abstract, 137
 2-Acetylaminofluorene, activation by human liver enzymes, 387
 Acrylonitrile, in bacteria, abstract, 241
 Actinic, keratosis, patients, repair of UV-induced DNA lesions in peripheral lymphocytes, abstract, 133
 Activation, of carcinogens, by human liver enzymes, 387
 —, in vivo, in mammals, of chemicals, testing in vitro, abstract, 202
 —, metabolic, in *A. nidulans*, genetic effects of fungicides, abstract, 224
 —, —, chromosomal effects of carcinogens and non-carcinogens on WI-38 after short-term exposures with and without, 297
 —, of nitrosomorpholine into a bacterial mutagen, deuterium isotope effect in, 265
 —, of a pro-carcinogen, to a mutagen, by cell-free extracts of anaerobic bacteria, 261
 Activity, mutagenic, of drugs, criteria for estimation, abstract, 234

Adenovirus, γ -irradiated, human KB cells infected with, viral DNA synthesis, abstract, 135
 —, repair of UV-induced damage, after infection of human fibroblast lines, abstract, 149
 Adenovirus-5, photodynamic action of chlorpromazine, abstract, 112
 Administration, influence of mode of, on aberrations in mouse, abstract, 242
 Aflatoxin B₁, activated, DNA repair in human cells treated with, abstract, 151
 —, activation by human liver enzymes, 387
 —, effects of diet on conversion of, to bacterial mutagens by rats, 313
 —, testing in *S. typhimurium*, 53
 Aflatoxins, in Chinese hamster cells, 27
 —, effect on Chinese hamster cells in culture, abstract, 227
 Ageing, pathologic, of nervous system, and xeroderma pigmentosum, abstract, 105
 Agricultural, chemicals, cytogenetic hazards from, 19
 Alanine-requiring, mouse L5178Y cells, mutagenicity testing of furylfuramide, 355
 Alkaline, elution method, and UV-irradiated human fibroblasts, abstract, 131
 Alkylated, DNA, enzymic repair, in vitro, abstract, 134
 Alkylating, agent, induced mutagenesis, physiological modification of, 1
 —, chemicals, damage in animal cells, abstract, 104
Allium cepa, cytogenetic hazards from agricultural chemicals, 19
 Amaranth, use of yeast cultures and fluctuation test, 165
 Ames, mutagenicity test, carcinogen activation by human liver enzymes, 387
 —, Salmonella test system, effects of diet on conversion of aflatoxin B₁ to bacterial mutagens by rats, 313

- 2-Aminoanthracene, as test substances, metabolism of carcinogens to mutagens in rats, 325
- 2-Aminobiphenyl, activation by human liver enzymes, 387
- 2-Aminofluorene, activation of a pro-carcinogen to a mutagen by cell-free extracts of anaerobic bacteria, 261
- Aminotriazole, in *A. nidulans*, 395
- Anaemia, cells, of Fanconi, impairment of cross-link repair, abstract, 120
- , Fanconi's, impairment of repair of DNA cross-links, abstract, 152
- Anaerobic, bacteria, cell-free extracts of, activation of a pro-carcinogen to a mutagen by, 261
- Anaesthetics, inhalational, induction of chromosomal abnormalities, 177
- Analysis, cytogenetic, of first meiotic metaphases of mouse, abstract, 208
- Animal, cells, treatment with UV or chemicals, abstract, 104
- , virus, mutagenesis by, abstract, 239
- Anomalies, karyotype, of Chinese hamster embryos, 63, 77
- Anti-mutagens, and anti-mutagenesis, abstract, 195
- Aromatic, amines, carcinogenic, lesions in rat liver DNA by, abstract, 132
- , hydrocarbons, polycyclic, in Chinese hamster cells, 27
- Ascites, tumour cells, of Ehrlich, elastogenic activity of 1,4-dinitrosopiperazine, abstract, 220
- , —, of mouse, influence of mode of administration of mutagens on aberration frequency, abstract, 242
- Aspergillus nidulans*, action of pesticides, 395
- , genetic effects of fungicides through metabolic activation, abstract, 224
- , relationship between chemical structure and mutagenic activity of some pesticides, abstract, 243
- Assay, host-mediated, mutagenic metabolic activation of *N*-nitrosomorpholine, abstract, 219
- , intrasanguineous, host-mediated, localization of *E. coli* K12 in livers of mice, used for, 45
- , microsome-mediated, with cultured mammalian cells, abstract, 206
- , of mutagenicity, of *Salmonella*, activation of a pro-carcinogen to a mutagen, 261
- , of mutation, of *Salmonella*, and cell transformation in vitro, as short-term carcinogen tests, abstract, 204
- Ataxia telangiectasia, γ -ray analogue of xeroderma pigmentosum, abstract, 148
- , X-ray-induced aberrations, abstract, 161
- 8-Azaguanine, resistance, in Chinese hamster, 403
- Azaguanine-resistant, Chinese hamster cell mutants, after SV40 infection, abstract, 239
- Bacillus thuringiensis*, exotoxin from, responses of root meristems to, 19
- , letter to editor, 385
- Bacteria, anaerobic, cell-free extracts of, activation of a pro-carcinogen to a mutagen by, 261
- , with different DNA repair capacities, damaging activity of mutagens and carcinogens, abstract, 214
- , effect of TPA on chemical mutagenesis in, abstract, 238
- , mutagenicity of acrylonitrile, abstract, 241
- , *rec⁻*, for testing of carcinogenic substances, 53
- Bacterial, mutagen, deuterium isotope effect in activation of nitrosomorpholine into, 265
- , —, effects of diet on conversion of aflatoxin B₁ to, by rats, 313
- , population, genetic variability, abstract, 238
- Bacteroides fragilis*, cell-free extracts of, activation of a pro-carcinogen to a mutagen by, 261
- Base-analogue, type, potent mutagens, *N*⁶-hydroxy-2-aminopurine, *N*⁴-hydroxycytidine and 5-methyl-*N*⁴-hydroxydeoxycytidine, abstract, 222

for non-dimer damage in UV-irradiated
DNA, abstract, 117
- , —, DNAase of, specific for single-stranded
DNA, abstract, 148
- , —, non-enzyme protein contributing to
efficiency of DNA repair in, abstract, 128
- , —, normal and xeroderma pigmentosum,
UV treatment and chemical carcinogens,
abstract, 139
- , —, photoreactivation of DNA synthesis
inhibition in, abstract, 159
- , —, treated with activated aflatoxin B₁,
DNA repair, abstract, 151
- , correxonuclease, a repair exonuclease iso-
lated from placenta, abstract, 114
- , diploid fibroblast culture, WI-38, chromo-
somal effects of carcinogens and non-car-
cinogens on, 297
- , fibroblast, cell strains, DNA-damaging
agents, abstract, 106
- , —, lines, repair of UV-induced damage in
adenovirus after infection of, abstract,
149
- , —, normal and defective, post-replication
repair in, 135
- , —, synergism between mitomycin C and
caffeine, abstract, 219
- , —, UV-irradiated, and alkaline elution
method, abstract, 131
- , KB cells, infected with γ -irradiated ade-
novirus, DNA synthesis, abstract, 135
- , liver, enzymes, activation of carcinogens,
387
- , lymphoblasts, diploid, comparative muta-
genicity of ICR-191 to, 11
- , lymphocytes, cultured, effect of carcino-
gens on sister chromatid exchange, 375
- , peripheral lymphocytes, repair of UV-in-
duced DNA lesions, abstract, 133
- , populations, monitoring of, in connection
with environmental pollution, abstract,
201
- Huntington's chorea, aberrations in cultured
fibroblasts, abstract, 146
- Hybrid, DNA, in formation of sister chro-
matid exchanges, abstract, 143

- Hydrocarbons, aromatic, polycyclic, in Chinese hamster cells, 27
- N⁶-Hydroxy-2-aminopurine, potent mutagen, abstract, 222
- N⁴-Hydroxycytidine, potent mutagen, abstract, 222
- ICR-191, comparative mutagenicity of, to *S. typhimurium* and diploid human lymphoblasts, 11
- Implantation, pre-, embryos, of Chinese hamster, 63, 77
- Inactivation, systems, of *Salmonella*, effect of heavy metal salts, abstract, 223
- Industrial, compounds, mutagenic activity of, abstract, 200
- Infection, of SV40, characterization of azaguanine-resistant Chinese hamster cell mutants after, abstract, 239
- Inhalational, anaesthetics, induction of chromosomal abnormalities, 177
- Inhibition, of testicular DNA synthesis by chemical mutagens and carcinogens, 305
- Insecticide, microbial, thuricide, responses of root meristems to exotoxin, constituent of, 19
- , organophosphate, genetic study on workers, abstract, 224
- Interaction, with basic genetic processes, modifying effects of chemicals due to, abstract, 193
- , of drug, influence on mutagenic activities, abstract, 194
- International Commission for Protection against Environmental Mutagens and Carcinogens, foundation of, 311
- , Workshop, Second, abstracts of papers presented at, DNA repair mechanisms in mammalian cells, 95
- Intestine, homogenates of, from pregnant rats, metabolism of carcinogens to mutagens, 325
- Intrasanguineous, host-mediated assay, localization of *E. coli* K12, in livers of mice, used for, 45
- In vitro, testing of chemicals, after in vivo activation in mammals, abstract, 202
- In vivo, activation, of chemicals, in mammals, testing in vitro, abstract, 202
- Ionizing, irradiation, low doses, end-group determination in DNA of mammalian cells, abstract, 112
- , and non-ionizing radiation damage, interaction in Chinese hamster cells, abstract, 123
- , radiations, cytogenetic investigation of persons exposed to, abstract, 208
- Ioxynil, in *A. nidulans*, 395
- Irradiation, γ , of adenovirus, human KB cells infected with, viral DNA synthesis in, abstract, 135
- , —, analogue of xeroderma pigmentosum, ataxia telangiectasia, abstract, 148
- , —, deficient repair in xeroderma pigmentosum cells, abstract, 142
- , —, of DNA of *M. luteus*, isolation of an endonuclease specific for, abstract, 154
- , —, repair of lesions, abstract, 109
- , γ or UV, repair of, supercoils in nuclear DNA and, abstract, 111
- , ionizing, cytogenetic investigation of persons exposed chronically to, abstract, 208
- , —, formation and fate of DNA damage, abstract, 136
- , —, low doses, end-group determination in DNA of mammalian cells, abstract, 112
- , —, and non-ionizing, interaction in Chinese hamster cells, abstract, 123
- , low and high LET, breakage, repair and survival, abstract, 110
- , near-UV, in Chinese hamster cells, abstract, 140
- , sensitivity of mouse oocytes, abstract, 208
- , UV, in Chinese hamster cells, abstract, 138
- , —, damage in animal cells, abstract, 104
- , —, DNA-binding protein from human cells specific for non-dimer damage, 117
- , —, endonucleolytic activity in xeroderma pigmentosum cells, abstract, 116
- , —, of *Herpes simplex* virus, decreased host-cell reactivation of, and excision repair in xeroderma pigmentosum, abstract, 160
- , —, of human fibroblasts, and alkaline elution method, abstract, 131
- , —, induction of repair and its inhibition in mammalian cells, abstract, 129
- , —, lesions in peripheral lymphocytes from healthy and non-healthy subjects, abstract, 133
- , —, low levels, properties of endonucleases from *M. luteus* specific for DNA's irradiated with, abstract, 122
- , in mammalian cells, enzymatic repair of, abstract, 147
- , —, and near-UV, damage and cell killing, abstract, 114
- , —, in normal and xeroderma pigmentosum cells, abstract, 139
- , —, products, of 5,6-dihydroxy-dihydrothymine type, abstract, 124

Irradiation, in mammalian cells, (*continued*)

- , —, plus psoralen, sister chromatid exchanges in patients, abstract, 228
- , —, repair of damage in adenovirus after infection of human fibroblast lines, abstract, 149
- , —, replicative bypass repair of, in mammalian cells, abstract, 119
- , —, sensitive mutant clones, of HeLa S3, and their repair abilities, abstract, 131
- , —, sensitivity in cultured skin fibroblasts from patients with Cockayne syndrome, abstract, 162
- , —, sister chromatid exchanges in xeroderma pigmentosum cells following, abstract, 163
- , —, in temperature-sensitive Chinese hamster cells, abstract, 142
- , —, X, aberrations in ataxia telangiectasia, abstract, 161
- , —, damage, and treatment with daunomycin, abstract, 107
- , —, and reaction of mammalian DNA polymerases and ligases, abstract, 109
- , —, sister chromatid exchanges, abstract, 116
- Isolation, of an endonuclease, specific for γ -irradiated DNA from *M. luteus*, abstract, 154
- Isopropylnoradrenochromo-mono-semicarbazone, procedure used in GDR testing system, abstract, 235
- Isotope, effect, of deuterium, in activation of nitrosomorpholine into a bacterial mutagen, 265
- Karyotype, anomalies, of Chinese hamster embryos, 63, 77
- Keratosis, actinic, patients, repair of UV-induced DNA lesions in peripheral lymphocytes, abstract, 133
- Kinetics, of cell, effect of carcinogens on sister chromatid exchange and, in cultured human lymphocytes, 375
- Lead acetate, in drinking water of monkeys, abstract, 206
- LET, low and high, radiation, breakage, repair and survival, abstract, 110
- Leukemia, dose—effect relationships in children under cytostatic therapy, abstract, 225
- Ligases, of DNA, in mammalian cells, abstract, 156
- , and polymerases, mammalian, and X-irradiated DNA, abstract, 109
- Lindex, use of yeast cultures and fluctuation test, 165
- Liver, enzymes, human, activation of carcinogens, 387
- , epithelial cells, of adult rat, carcinogenic activity of safrole, abstract, 221
- , homogenate-mediated mutagenesis, in Chinese hamster cells, by polycyclic aromatic hydrocarbons, 27
- , homogenates, mammalian, mutagenic metabolic activation of *N*-nitrosomorpholine, abstract, 219
- , —, from pregnant rats, metabolism of carcinogens to mutagens, 325
- , of mice, localization of *E. coli* K12 in, used for intrasanguineous host-mediated assay, 45
- , —, microsome-activated dimethylnitrosamine, induction of 6-thioguanine-resistant mutants in Chinese hamster cells, 365
- , microsome test, mutagenicity of chrysene, abstract, 209
- , of rat, pre-cancerous transformation in, by diethylnitrosamine, abstract, 153
- Localization, of *E. coli* K12 livers of mice, used for intrasanguineous host-mediated assay, 45
- Locus, *yg2*, somatic mutations at, by treatment of maize seeds differing in metabolic state and cell population, 285
- Long-term, exposures, to chemical mutagens, abstract, 198
- Lung, homogenates of, from pregnant rats, metabolism of carcinogens to mutagens, 325
- Lymphoblasts, human, diploid, comparative mutagenicity of ICR-191 to, 11
- Lymphocytes, human, cultured, effect of carcinogens on sister chromatid exchange, 375
- , peripheral, from healthy and non-healthy subjects, UV-induced DNA lesions, abstract, 133
- Mahogany dye, use of yeast cultures and fluctuation test, 165
- Maize, effectiveness and efficiency of sodium azide versus ethyl methanesulphonate in, 285
- Male, meiotic studies, new way of mutagenicity testing, abstract, 207
- , mouse, procarbazine-induced specific-locus mutations, abstract, 218
- Malformations, multiple, monitory of aberrations by screening of, abstract, 231
- Malignancies, in children, under cytostatic therapy, dose—effect relationships, abstract, 225

Malignant, diseases, action of some chemotherapeutics, abstract, 226

Mammalian, cells, action of β -propiolactone, abstract, 141

—, —, a carcinogen-induced protein X-like substance in, abstract, 126

—, —, cross-link repair, and its impairment in Fanconi's anaemia cells, abstract, 120

—, —, cultured, microsome-mediated assays with, abstract, 206

—, —, —, removal of *N*-acetoxy-*N*-2-acetylaminofluorene adducts and pyrimidine dimers, abstract, 137

—, —, DNA repair mechanisms, abstract of papers, 95

—, —, end-group determination in DNA of, after ionizing radiation, abstract, 112

—, —, enzymatic repair of UV-damaged DNA, abstract, 147

—, —, in vitro, analysis of repair processes, abstract, 156

—, —, relationships between repair, aberrations and survival, abstract, 154

—, —, replicative bypass repair of UV damage, abstract, 119

—, —, two DNA ligases in, abstract, 156

—, —, UV-induced repair, and its inhibition, abstract, 129

—, DNA polymerases, and ligases, and X-irradiation, abstract, 109

—, liver homogenates, mutagenic metabolic activation of *N*-nitrosomorpholine, using microorganisms, abstract, 219

—, spot test, sensitivity of, abstract, 202

Mammals, natural population, genetical monitoring, abstract, 229

—, testing of chemicals in vitro, after in vivo activation, abstract, 202

Man, cytogenetic investigation of persons exposed chronically to ionizing radiations, abstract, 208

—, dose-effect relationships in children with leukemia, abstract, 225

—, extrapolation to, significance of genetic aspects of dose-effect relationships, abstract, 196, 197

—, genetic study on polyvinylchloride workers, abstract, 215

—, population cytogenetic study of effect of epichlorohydrin, abstract, 227

—, producing organophosphate insecticides, genetic study, abstract, 224

—, rare recessively transmitted disorders, evidence of defective DNA repair, abstract, 121

—, sister chromatid exchanges in patients treated with psoralen plus UV, abstract, 228

Man, (continued)

—, spontaneous mutation rates, abstract, 199

Manganese sulphate, use of yeast cultures and fluctuation test, 165

Mechanisms, of repair of DNA, in mammalian cells, abstracts of papers, 95

Mecoprop, in *A. nidulans*, 395

Meiotic, metaphases, first, cytogenetic analysis of, of mouse, abstract, 208

—, nondisjunction, increase of, in Neurospora test system by *p*-fluorophenylalanine, 345

—, —, spontaneous, in mouse oocytes, abstract, 209

—, studies, of males, new way of mutagenicity testing, abstract, 207

6-Mercaptopurine, cytogenetic basis of dominant-lethal mutations in mice, abstract, 230

Meristems, of root, response of, to exotoxin, from *B. thuringiensis*, 19

Metabolic, activation, in *A. nidulans*, genetic effects of fungicides, abstract, 224

—, —, chromosomal effects of carcinogens and non-carcinogens on WI-38 after short-term exposures with and without, 297

—, derivatives, of safrole, mutagenicity, abstract, 217

Metabolism, of carcinogens to mutagens, in homogenates of pregnant rat and foetal tissues, 325

—, of drug, modifying effects of environmental chemicals on, abstract, 193

Metal, heavy, salts, effect on *Salmonella* inactivation systems, abstract, 223

Metaphases, first meiotic, cytogenetic analyses of, of mouse, abstract, 208

Methods, comparison of, of mutagenicity testing in *Drosophila*, abstract, 212

Methoxyflurane, chromosomal abnormalities by inhalational anaesthetics, 177

3-Methylcholanthrene, activation by human liver enzymes, 387

—, in Chinese hamster cells, 27

—, chromosomal effects on WI-38, 297

—, metabolism of chemicals to mutagens in homogenates from pregnant rat, 325

—, testing in *S. typhimurium*, 53

—, as test substance, metabolism of carcinogens to mutagens in rats, 325

Methylene dimethanesulphonate, resistance and nature of damage, abstract, 117

5-Methyl-*N*⁴-hydroxydeoxycytidine, potent mutagen, abstract, 222

Methyl methanesulphonate, effect on sister chromatid exchange frequency in cultured human lymphocytes, 375

- N*-Methyl-*N'*-nitro-*N*-nitrosoguanidine, chromosomal effects on WI-38, 297
- , temporal aspects, abstract, 144
 - , testing in *E. coli* strains, 53
 - , testing in *S. typhimurium*, 53
- N*-Methyl-*N*-nitrosourea, in *E. coli*, effect of growth rate and repair capacity, 1
- Microbial, fluctuation test, use of yeast cultures for detection of environmental mutagens, 165
- , insecticide, thuricide, responses of root meristems to exotoxin, constituent of, 19
- Micrococcus luteus*, endonucleases from, specific for DNA's irradiated with low levels of UV, abstract, 122
- , isolation of an endonuclease, specific for γ -irradiated DNA from, abstract, 154
- Micronucleus, test, and chromosome examination, comparison of, in detecting potential mutagenesis, abstract, 240
- Microorganisms, mutagenic metabolic activation of *N*-nitrosomorpholine in host-mediated assay, abstract, 219
- Microsome-mediated, assays, with cultured mammalian cells, abstract, 206
- , mutagenesis, of Chinese hamster cell line, by nitrosamines, abstract, 205
- Microsomes, hepatic, of rat, effects of diet on conversion of aflatoxin B₁ to bacterial mutagens, 313
- , of mouse liver, activation of dimethylnitrosamine, 6-thioguanine-resistant mutants in Chinese hamster cells induced by, 365
 - , test, *Salmonella*, mutagenicity of chrysene, abstract, 209
- Migration, of branch, possible role of, in excision and replication repair, abstract, 158
- Mitochondrial, and nuclear mutagenesis, comparison, abstract, 233
- Mitomycin C, and caffeine, synergism between, in human fibroblasts, abstract, 219
- , effect on sister chromatid exchange frequency in cultured human lymphocytes, 375
- Modification, physiological, of alkylating agent-induced mutagenesis, 1
- Modifying, effects, in chemical mutagenesis, abstract, 190
- , —, of chemicals, due to interaction with basic genetic processes, abstract, 193
 - , —, of environmental chemicals on drug metabolism, abstract, 193
- Monitoring, genetical, of natural population of birds and mammals, abstract, 229
- Monitoring, (continued)
- , of human populations in connection with environmental pollution, abstract, 201
- Monitory, of aberrations, by screening of multiple malformations, abstract, 231
- Monkeys, treatment with lead acetate in drinking water, abstract, 206
- Morphological, transformation, in hamster embryonic cells treated with potassium dichromate in vitro, 87
- Mouse, bone marrow, cells, clastogenic activity of 1,4-dinitrosopiperazine, abstract, 220
- , —, influence of mode of administration of mutagens on aberration frequency, abstract, 242
 - , CD, livers, localization of *E. coli* K12 in, used for intrasanguineous host-mediated assay, 45
 - , cells, L5178Y, alanine-requiring, mutagenicity testing of furylfuramide, 355
 - , cytogenetic basis of dominant-lethal mutations, abstract, 230
 - , detection of induced point mutations by protein-mapping, abstract, 203
 - , liver, microsome-activated dimethylnitrosamine, induction of 6-thioguanine-resistant mutants in Chinese hamster cells by, 365
 - , male, procarbazine-induced specific-locus mutations, abstract, 218
 - , oocytes, radiation sensitivity, abstract, 208
 - , —, spontaneous meiotic nondisjunction, abstract, 209
 - , testis, radiosensitivities of DNA molecules, abstract, 145
 - , unscheduled DNA synthesis by chemical mutagens, in spermatogenic cells, abstract, 210
- Mutagen, *N*-acetoxy-*N*-2-acetylaminofluorene, adducts, removal of, and pyrimidine dimers, from DNA, abstract, 137
- , 2-acetylaminofluorene, activation by human liver enzymes, 387
 - , acrylonitrile, in bacteria, abstract, 241
 - , activation of a pro-carcinogen to a, by cell-free extracts of anaerobic bacteria, 261
 - , aflatoxin B₁, activated, DNA repair in human cells treated with, abstract, 151
 - , —, activation by human liver enzymes, 387
 - , —, effects of diet on conversion of, to bacterial mutagens by rats, 313
 - , —, testing in *S. typhimurium*, 53
 - , aflatoxins, in Chinese hamster cells, 27

Mutagen, aflatoxins, (continued)

- , —, effect on Chinese hamster cells in culture, abstract, 227
- , agricultural chemicals, cytogenetic hazards from, 19
- , alkylating agent, induced mutagenesis, physiological modification of, 1
- , alkylating chemicals, damage in animal cells, abstract, 104
- , amaranth, use of yeast cultures and fluctuation test, 165
- , 2-aminobiphenyl, activation by human liver enzymes, 387
- , 2-aminofluorene, activation of a pro-carcinogen to a mutagen by cell-free extracts of anaerobic bacteria, 261
- , aminotriazole, in *A. nidulans*, 395
- , anti-, and anti-mutagenesis, abstract, 195
- , bacterial, deuterium isotope effect in activation of nitrosomorpholine into, 265
- , —, effects of diet on conversion of aflatoxin B₁ to, by rats, 313
- , basfungin, in rats, dominant-lethal study, abstract, 240
- , benomyl, in *A. nidulans*, 395
- , benz(a)anthracene, in Chinese hamster cells, 27
- , benzidine, activation by human liver enzymes, 387
- , —, testing in *S. typhimurium*, 53
- , benzo(a)pyrene, activation by human liver enzymes, 387
- , —, in Chinese hamster cells, 27
- , —, chromosomal effects on WI-38, 297
- , —, effect on sister chromatid exchange frequency in cultured human lymphocytes, 375
- , —, testing in *E. coli* strains, 53
- , —, testing in *S. typhimurium*, 53
- , benzylphenylnitrosamine, testing in *S. typhimurium*, 53
- , 1,3-bis(2-chloroethyl)-3-nitrosourea, comparative studies in different test systems, abstract, 225
- , bis-(2-chloroethyl)-sulphide, testing in *S. typhimurium*, 53
- , 7-bromomethylbenz(a)anthracene, in Chinese hamster cells, postreplication repair, abstract, 151
- , —, in Chinese hamster and HeLa cells, excision repair, abstract, 113
- , caffeine, chromosomal effects on WI-38, 297
- , —, insensitive error-prone repair process in Chinese hamster cells, abstract, 118
- , —, and mutagenic agents, in mammalian cells, abstract, 130

Mutagen, caffeine, (continued)

- , —, synergism between mitomycin C and, in human fibroblasts, abstract, 219
- , captafol, in *A. nidulans*, 395
- , captan, in *A. nidulans*, 395
- , carcinogens, chemical, in normal and xeroderma pigmentosum cells, abstract, 139
- , chemical, and carcinogens, inhibitor of testicular DNA synthesis by, 305
- , —, DNA damaging activity in bacteria, abstract, 214
- , —, significance of long-term exposure, abstract, 198
- , —, unscheduled DNA synthesis in spermatogenic cells of mouse, abstract, 210
- , chemicals, aberrations produced in vivo by, abstract, 216
- , —, repair of lesions, abstract, 109
- , —, sister chromatid exchanges, abstract, 116
- , chemotherapeutics, in malignant diseases, abstract, 226
- , chloroethylenes, mutagenic activity analysed by screening system tests, abstract, 214
- , 2-chloroethyl sulphide, testing in *E. coli* strains, 53
- , chlorpromazine, photodynamic action on adenovirus-5, abstract, 112
- , chromium compounds, in hamster embryonic cells, in vitro, 87
- , chrysene, in cytogenetic experiments, and Salmonella test, abstract, 209
- , CNU-ethanol, comparative mutagenicity studies, different test systems, abstract, 225
- , dalapon-Na, in *A. nidulans*, 395
- , daunomycin, and X-irradiation, in L-929 cells, abstract, 107
- , DDT, genetical monitoring of natural population of birds and mammals, abstract, 229
- , dibenz(a,c)anthracene, in Chinese hamster cells, 27
- , dibenz(a,h)anthracene, in Chinese hamster cells, 27
- , dibenz(a,h)anthracene, in *S. typhimurium*, 53
- , dibenz(a,i)pyrene, in *S. typhimurium*, 53
- , dichlorvos, in *A. nidulans*, 395
- , diepoxybutane, testing in *E. coli* strains, 53
- , —, testing in *S. typhimurium*, 53
- , diethylnitrosamine, in Chinese hamster, 403

Mutagen, (continued)

- , effect on sister chromatid exchange frequency in cultured human lymphocytes, 375
- , pre-cancerous transformation in rat liver by, abstract, 153
- , testing in *S. typhimurium*, 53
- , diethyl stilboestrol, cytogenetic studies, abstract, 210
- , 7,12-dimethylbenz(a)anthracene, in Chinese hamster cells, 27
- , testing in *S. typhimurium*, 53
- , dimethylnitrosamine, effect on sister chromatid exchange frequency in cultured human lymphocytes, 375
- , mouse liver microsome-activated, 6-thioguanine-resistant mutants induced in Chinese hamster cells by, 365
- , testing in *S. typhimurium*, 53
- , *N,N*-dimethyl-*p*-phenylazoaniline, testing in *S. typhimurium*, 53
- , 1,4-dinitrosopiperazine, clastogenic activity, abstract, 220
- , dinobuton, in *A. nidulans*, 395
- , divaskan, procedure used in GDR mutagenicity testing system, abstract, 235
- , dodine, in *A. nidulans*, 395
- , effect of, on genetic variability in bacterial population, abstract, 238
- , environmental, detection of, use of yeast cultures for, 165
- , fluctuation test for detecting, in *S. cerevisiae*, abstract, 213
- , testing of, perspective for studies in 'comparative mutagenesis', 245
- , epichlorohydrin, population cytogenetic study, abstract, 227
- , ethidium bromide, mutagenesis in *S. cerevisiae*; modulation by growth medium components, 269
- , ethyl methanesulphonate, cytogenetic basis of dominant-lethal mutations in mice, abstract, 230
- , detection of somatic mutation in Chinese hamster, 403
- , effectiveness and efficiency of sodium azide versus, in maize, 285
- , effect on sister chromatid exchange frequency in cultured human lymphocytes, 375
- , use of yeast cultures and fluctuation test, 165
- , exotoxin, from *B. thuringiensis*, responses of root meristems to, 19
- , *p*-fluorophenylalanine, increase of meiotic nondisjunction in *N. crassa* test system, 345

Mutagen, (continued)

- , furylfuramide, testing by using alanine-requiring mouse cells, 355
- , haloethers, genetic risk of occupational exposures, abstract, 242
- , halothane, chromosomal abnormalities in *V. faba*, 177
- , hepatocarcinogens, repair in vivo of rat-liver DNA damaged by, abstract, 115
- , *N*⁶-hydroxy-2-aminopurine, potent mutagen, abstract, 222
- , *N*⁴-hydroxycytidine, potent mutagen, abstract, 222
- , ICR-191, comparative mutagenicity of, to *S. typhimurium* and diploid human lymphoblasts, 11
- , industrial compounds, activity of, abstract, 200
- , ioxynil, in *A. nidulans*, 395
- , isopropylnoradrenochromo-monosemicarbazone, procedure used in GDR testing system, abstract, 235
- , lead acetate, in drinking water of monkeys, abstract, 206
- , index, use of yeast cultures and fluctuation test, 165
- , mahogany dye, use of yeast cultures and fluctuation test, 165
- , manganese sulphate, use of yeast cultures and fluctuation test, 165
- , mecoprop, in *A. nidulans*, 395
- , 6-mercaptopurine, cytogenetic basis of dominant-lethal mutations in mice, abstract, 230
- , metabolism of carcinogens to, in homogenates of pregnant rat and foetal tissues, 325
- , methoxyflurane, chromosomal abnormalities in *V. faba*, 177
- , 3-methylcholanthrene, activation by human liver enzymes, 387
- , in Chinese hamster cells, 27
- , chromosomal effects on WI-38, 297
- , testing in *S. typhimurium*, 53
- , methylene dimethanesulphonate, resistance and nature of damage, abstract, 117
- , 5-methyl-*N*⁴-hydroxydeoxycytidine, potent mutagen, abstract, 222
- , methyl methanesulphonate, effect on sister chromatid exchange frequency in cultured human lymphocytes, 375
- , *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, chromosomal effects on WI-38, 297
- , temporal aspects, abstract, 144
- , testing in *E. coli*, 53
- , testing in *S. typhimurium*, 53
- , *N*-methyl-*N*-nitrosourea, in *E. coli*, effect of growth rate and repair capacity, 1

Mutagen, (continued)

- , mitomycin C, and caffeine, synergism between, in human fibroblasts, abstract, 219
- , —, effect on sister chromatid exchange frequency in cultured human lymphocytes, 375
- , 2-naphthylamine, activation by human liver enzymes, 387
- , —, testing in *S. typhimurium*, 53
- , neburon, in *A. nidulans*, 395
- , 4-nitrophenyl, activation by human liver enzymes, 387
- , 2-nitrofluorene, testing in *S. typhimurium*, 53
- , 3-nitro-9-fluorenone, testing in *S. typhimurium*, 53
- , 4-nitroquinoline 1-oxide, chromosomal effects on WI-38, 297
- , nitrosamines, microsome-mediated mutagenesis of Chinese hamster cell line by, abstract, 205
- , *N*-nitrosoethylurea, testing in *S. typhimurium*, 53
- , nitrosomethylurea, in *E. coli*, effect of growth rate and repair capacity, 1
- , —, plastome mutations in *Saintpaulia*, abstract, 232
- , nitrosomorpholine, deuterium isotope effect in activation of, into a bacterial mutagen, 265
- , —, mutagenic metabolic activation, in *S. typhimurium*, abstract, 219
- , nitrosopyrrolidine, testing in *S. typhimurium*, 53
- , orange RN, use of yeast cultures and fluctuation test, 165
- , organophosphate insecticides, genetic studies on workers, abstract, 224
- , paraquat, use of yeast cultures and fluctuation test, 165
- , pesticides, action in *A. nidulans*, 395
- , *p*-phenylazoaniline, testing in *S. typhimurium*, 53
- , phosan-plus, cytogenetic and genetic effects, abstract, 204
- , picloram, in *A. nidulans*, 395
- , polycyclic aromatic hydrocarbons, in Chinese hamster cells, 27
- , polyvinylchloride, genetic study on workers with, abstract, 215
- , potassium dichromate, treatment of syrian hamster embryonic cells, in vitro, 87
- , potential, comparison of micronucleus test and chromosome examination in detection of, abstract, 240
- , procarbazine, in male mouse, abstract, 217

Mutagen, (continued)

- , β -propiolactone, and DNA synthesis in mammalian cells, abstract, 141
- , psoralen, damaged DNA duplexes, cause of undamaged homologous molecules to be nicked, abstract, 127
- , —, plus UV, sister chromatid exchanges in patients, abstract, 228
- , pyrene, chromosomal effects on WI-38, 297
- , safrole, in adult rat liver epithelial cells, abstract, 221
- , —, metabolic derivatives, mutagenicity of, abstract, 217
- , sodium arsenite, in Chinese hamster cell line Dede, abstract, 234
- , sodium azide, effectiveness of, versus ethyl methanesulphonate in maize, 285
- , sterigmatocystin, activation by human liver enzymes, 387
- , thioacetamide, testing in *S. typhimurium*, 53
- , thiomersal, use of yeast cultures and fluctuation test, 165
- , thuringiensin A, cytogenetic hazards, 19
- , 4-*O*-tolylazo-*O*-toluidine, testing in *S. typhimurium*, 53
- , tordon, in *A. nidulans*, 395
- , trenimon, karyotype anomalies in Chinese hamster embryos, 77
- , triethylenemelamine, cytogenetic basis of dominant-lethal mutations in mice, abstract, 230
- , 4,5',8-trimethylpsoralen, in Chinese hamster cells, abstract, 140
- , vinylchloride, adverse biological effects in short-term tests, abstract, 200
- , —, testing of urine of rats, abstract, 230
- Mutagen—carcinogen, exposure, use of sister chromatid exchange techniques for cytological detection of, abstract, 205
- Mutagenesis, alkylating agent-induced, physiological modification of, 1
- , anti-, and anti-mutagens, abstract, 195
- , chemical, in bacteria, effect of TPA on, abstract, 238
- , —, modifying effects, abstract, 190
- , comparative, perspective for studies in, and testing for environmental mutagens, 245
- , of ethidium bromide, in *S. cerevisiae*; modulation by growth medium components, 269
- , liver homogenate-mediated mutagenesis, in Chinese hamster cells, by polycyclic aromatic hydrocarbons, 27

Mutagenesis, (continued)

- , low-level, and spontaneous mutation rates, abstract, 196
- , microsome-mediated, of Chinese hamster cell line, by nitrosamines, abstract, 205
- , mitochondrial and nuclear, comparison, abstract, 233
- , and predictive carcinogenesis, report on workshop on, 1977, 409
- Mutagenic, action, of pesticides, in *A. nidulans*, 395
- , activity, and chemical structure, relationship between, in some pesticides, abstract, 243
- , —, of drugs, criteria for estimation, abstract, 234
- , agents, and caffeine treatment, in mammalian cells, abstract, 130
- Mutagenicity, assay, of Salmonella, activation of a pro-carcinogen to a mutagen, 261
- , of chemical carcinogens, abstract, 190
- , comparative, of ICR-191, to *S. typhimurium* and diploid human lymphoblasts, 11
- , studies, comparative, in different test systems, with nitrosoureas, abstract, 225
- , test, of Ames, carcinogen activation by human liver enzymes, 387
- , testing, in *Drosophila*, comparison of methods, abstract, 212
- , —, of herbicides with a haploid *Pelargonium*, abstract, 232
- , —, male meiotic and postmeiotic studies, abstract, 207
- , —, system, of the GDR, testing procedure exemplified by divaskan, abstract, 235
- Mutagens, Environmental, and Carcinogens, International Commission for Protection against, foundation of, 311
- Mutant, clones, of HeLa S3, UV-sensitive, and their repair abilities, abstract, 131
- Mutants, of Chinese hamster cells, azaguanine-resistant, after SV40 infection, abstract, 239
- , frame-shift, *lac Z*, of *E. coli* K12, reversion induction, abstract, 243
- , *lac Z*, frame-shift, of *E. coli* K12, reversion induction, abstract, 243
- , of *S. typhimurium*, TA 98 and 100, metabolism of carcinogens to mutagens, in homogenates of pregnant rat and foetal tissues, detected in, 325
- , 6-thioguanine-resistant, induced in Chinese hamster cells, by mouse liver microsome-activated dimethylnitrosamine, 365

- Mutation, assay, Salmonella, and transformation of cells in vitro, as short-term carcinogen tests, abstract, 204
- , dominant-lethal, in mice, cytogenetic basis of, abstract, 230
- , of gene, and significance of genetic aspects of dose-effect relationships, abstract, 196
- , plastome, in Saintpaulia, after treatment with *N*-nitroso-*N*-methylurea, abstract, 232
- , point, in mouse, detection by protein-mapping, abstract, 203
- , rates, spontaneous, and low level mutagenesis, abstract, 196
- , —, in man, abstract, 199
- , research, basic, recent advances, abstract, 189
- , somatic, detection of, in Chinese hamster, 403
- , —, in maize by treatment of seeds differing in metabolic state and cell population, 285
- , specific-locus, by procarbazine, in male mice, abstract, 218
- 2-Naphthylamine, activation by human liver enzymes, 387
- , testing in *S. typhimurium*, 53
- Natural, population, of birds and mammals, genetical monitoring, abstract, 229
- Neburon, in *A. nidulans*, 395
- Nervous system, ageing of, and repair defects of xeroderma pigmentosum, abstract, 105
- Neurospora crassa*, test system, increase of meiotic nondisjunction by *p*-fluorophenylalanine, 345
- 4-Nitrobiphenyl, activation by human liver enzymes, 387
- 2-Nitrofluorene, testing in *S. typhimurium*, 53
- 3-Nitro-9-fluorenone, testing in *S. typhimurium*, 53
- 4-Nitroquinoline 1-oxide, chromosomal effects on WI-38, 297
- Nitrosamines, microsome-mediated mutagenesis of Chinese hamster cell line by, abstract, 205
- N*-Nitrosoethylurea, testing in *S. typhimurium*, 53
- Nitrosomethylurea, in *E. coli*, effect of growth rate and repair capacity, 1
- , plastome mutations in Saintpaulia, abstract, 232
- Nitrosomorpholine, deuterium isotope effect in activation of, into a bacterial mutagen, 265

Nitrosomorpholine, (continued)

—, mutagenic metabolic activation, in *S. typhimurium*, abstract, 219

Nitrosopyrrolidine, testing in *S. typhimurium*, 53

Nitrosoureas, comparative mutagenicity studies in different test systems, abstract, 225

Nitrous acid, formation of promutagens from herbicides in presence of, abstract, 217

Non-carcinogens, and carcinogens, chromosomal effects of, on WI-38 after short-term exposures with and without metabolic activation, 297

Nondisjunction, meiotic, increase of, in *Neurospora* test system by *p*-fluorophenylalanine, 345

—, —, spontaneous, in mouse oocytes, abstract, 209

Nuclear, DNA, supercoils in, and repair of radiation damage, abstract, 111

—, and mitochondrial mutagenesis, comparison, abstract, 233

Nuclei, human, isolated, DNA repair in, abstract, 107

Occupational, exposures, to haloethers, genetic risk, abstract, 242

—, hazards, mutagenic activity of industrial compounds, abstract, 200

Oocytes, of mouse, radiation sensitivity, abstract, 208

—, —, spontaneous meiotic nondisjunction, abstract, 209

Oral, contraceptives, and possible breast cancer, chromosomes and, abstract, 236

Orange RN, use of yeast cultures and fluctuation test, 165

Organic, compounds, pseudoatomic potential and cytostatic activity, abstract, 241

Organophosphate, insecticides, genetic study on workers, abstract, 224

Ouabain, resistance, in Chinese hamster, 403

Paraquat, use of yeast cultures and fluctuation test, 165

Paternal, germ cells, postmeiotic, of Chinese hamster, karyotype anomalies after trenimon treatment, 77

Patients, treated with psoralen plus UV, sister chromatid exchanges, abstract, 228

Pelargonium, haploid, mutagenicity testing of herbicides with, abstract, 232

Peripheral, lymphocytes, from healthy and non-healthy subjects, UV-induced DNA lesions, abstract, 133

Pesticides, action in *A. nidulans*, 395

—, relationship between chemical structure and mutagenic activity, abstract, 243

Phenobarbital, metabolism of chemicals to mutagens in homogenates from pregnant rat, 325

p-Phenylazoaniline, testing in *S. typhimurium*, 53

Phosan-plus, cytogenetic and genetic effects, abstract, 204

Photodynamic, action, of chlorpromazine, on adenovirus-5, abstract, 112

Photoreactivation, of DNA synthesis inhibition in human cells, abstract, 159

Physiological, modification, of alkylating agent-induced mutagenesis, 1

Picloram, in *A. nidulans*, 395

Placenta, homogenates of, from pregnant rats, metabolism of carcinogens to mutagens, 325

—, a repair exonuclease isolated from placenta, human correxonuclease, abstract, 114

Plastome, mutations, in Saintpaulia, after treatment with *N*-nitroso-*N*-methylurea, abstract, 232

Point mutations, in mouse, detection by protein-mapping, abstract, 203

Pollution, environmental, monitoring of human populations in connection with, abstract, 201

Polychlorinated biphenyls, metabolism of chemicals to mutagens in homogenates from pregnant rat, 325

Polycyclic aromatic hydrocarbons, in Chinese hamster cells, 27

Polymerases, of DNA, α and β , in fibroblasts, from xeroderma pigmentosum, abstract, 108

—, and ligases, mammalian, and X-irradiated DNA, abstract, 109

Polyvinylchloride, genetic study on workers with, abstract, 215

Population, bacterial, genetic variability, abstract, 238

—, cytogenetic study, of effect of epichlorohydrin, abstract, 227

—, human, monitoring of, in connection with environmental pollution, abstract, 201

—, natural, of birds and mammals, genetical monitoring, abstract, 229

Postmeiotic, germ cells, of Chinese hamster, karyotype anomalies after trenimon treatment, 77

—, studies, of males, new way of mutagenicity testing, abstract, 207

Post-replication, repair, in normal and defective human fibroblasts, abstract, 135

Potassium dichromate, treatment of syrian hamster embryonic cells, in vitro, 87

Potential, mutagens, comparison of micro-nucleus test and chromosome examination in detection of, abstract, 240

—, pseudoatomic, and cytostatic activity of organic compounds, abstract, 241

Pregnant, rat, homogenates of, and foetal tissues, metabolism of carcinogens to mutagens, 325

Pre-implantation, embryos, of Chinese hamster, 63, 77

Preservative, of food, furylfuramide, testing by using alanine-requiring mouse cells, 355

Procarbazine, in male mouse, abstract, 218

Pro-carcinogen, activation of, to a mutagen, by cell-free extracts of anaerobic bacteria, 261

Procedure, of testing, used in GDR testing system, exemplified by divaskan, abstract, 235

Promutagens, from herbicides pyrazon and chlorthiamid in presence of nitrous acid, abstract, 217

β -Propiolactone, and DNA synthesis in mammalian cells, abstract, 141

Protection against Environmental Mutagens and Carcinogens, International Commission for, foundation of, 311

Protein, non-enzyme, contributing to efficiency of DNA repair in human cells, abstract, 128

Protein-mapping, detection of induced point mutations in mouse by, abstract, 203

Protein X-like, substance, in mammalian cells, induced by a carcinogen, abstract, 126

Pseudoatomic, potential, and cytostatic activity of organic compounds, abstract, 241

Psoralen, damaged DNA duplexes, cause of undamaged homologous molecules to be nicked, abstract, 127

—, plus UV, sister chromatid exchanges in patients, abstract, 228

Pyrazon, formation of promutagens from, in presence of nitrous acid, abstract, 217

Pyrene, chromosomal effects on WI-38, 297

Radiosensitivity, of DNA molecules of mouse testis, abstract, 145

Rat, dominant-lethal study of basfungin, abstract, 240

—, effects of diet on conversion of aflatoxin B₁ to bacterial mutagens, 313

Rat, (continued)

—, liver, DNA, damaged by hepatocarcinogens, repair in vivo, abstract, 115

—, —, lesions by carcinogenic aromatic amines, abstract, 132

—, —, epithelial cells, carcinogenic activity of safrole, abstract, 221

—, —, pre-cancerous transformation in, by diethylnitrosamine, abstract, 153

—, mutagenicity testing of urine, after vinylchloride treatment, abstract, 230

—, pregnant, homogenates of, and foetal tissues, metabolism of carcinogens to mutagens, 325

rec⁻, bacteria, for testing of carcinogenic substances, 53

Recombinogenic, action, of pesticides, in *Aspergillus*, 395

Relationship, between chemical structure, and mutagenic activity in some pesticides, abstract, 243

—, dose-effect, in children with leukemia, abstract, 225

—, —, genetic aspects, significance for extrapolation to man, abstract, 196, 197

—, —, viewpoint of toxicology, abstract, 198

Repair, capability, of cells, quantitative, non-genetic factors, abstract, 157

—, capacity, effect of, on nitrosomethylurea-induced mutation of *E. coli*, 1

—, enzymic, of alkylated DNA in vitro, abstract, 134

—, mechanisms, DNA, in mammalian cells, abstracts of papers, 95

Replication, repair, possible role of branch migration in, abstract, 158

Replicative, bypass repair, of UV damage, in various lines of mammalian cells, abstract, 119

Report, on workshop on mutagenesis and predictive carcinogenesis, 1977, 409

Research, of mutation, basic, recent advances, abstract, 189

Resistance, to 8-azaguanine and ouabain, in Chinese hamster, 403

—, to methylene dimethanesulphonate, abstract, 117

Reversion, induction, in *lac Z* frame-shift mutants of *E. coli* K12, abstract, 243

Risk, genetic, of occupational exposures to haloethers, abstract, 242

Root, meristems, response of, to exotoxin, from *B. thuringiensis*, 19

—, tips, of *V. faba*, induction of chromosomal abnormalities by inhalational anaesthetics, 177

- Saccharomyces cerevisiae*, cultures, use of, for detection of environmental mutagens, 165
- , ethidium bromide mutagenesis in; modulation by growth medium components, 269
 - , fluctuation test for detecting environmental mutagens, abstract, 213
- Safrole, in adult rat liver epithelial cells, abstract, 221
- , metabolic derivatives, mutagenicity of, abstract, 217
- Saintpaulia, plastome mutations, after *N*-nitroso-*N*-methyleurea, abstract, 232
- Salmonella typhimurium*, carcinogen activation by human liver enzymes, 387
- , comparative mutagenicity of ICR-191 to, 11
 - , inactivation systems, effect of heavy salts, abstract, 223
 - , liver microsome test, mutagenicity of chrysene, abstract, 209
 - , mutagenicity assay, activation of a pro-carcinogen to a mutagen, 261
 - , mutation assay, and transformation of cells, in vitro, as short-term carcinogen tests, abstract, 204
 - , relationship between chemical structure and mutagenic activity of some pesticides, abstract, 243
 - , TA 98 and 100, metabolism of carcinogens to mutagens in homogenates of pregnant rat and foetal tissues, 325
 - , TA 1535, deuterium isotope effect in activation of nitrosomorpholine into a bacterial mutagen, 265
 - , testing of carcinogenic substances, 53
 - , test system, of Ames, effects of diet on conversion of aflatoxin B₁ to bacterial mutagens by rats, 313
 - , —, testing of urine from vinylchloride-treated rats, abstract, 230
- Salts, of heavy metals, effect on *Salmonella* inactivation systems, abstract, 223
- Screening, comparison of methods and, in mutagenicity testing in *Drosophila*, abstract, 212
- , of multiple malformations, monitory of aberrations by, abstract, 231
 - , system tests, mutagenic activity of chloroethylenes analysed by, abstract, 214
- Seeds, of maize, treatment of sodium azide, 285
- Selection, and mutagens, effect of, on genetic variability in bacterial population, abstract, 238
- Sensitivity, of *E. coli rec⁻* strains, to carcinogenic substances, 53
- Sensitivity, (continued)
- , of irradiation, of mouse oocytes, abstract, 208
 - , of mammalian spot test, abstract, 202
- Short-term tests, carcinogen, *Salmonella* mutation assay and cell transformation, abstract, 204
- , evaluating adverse biological effects of vinyl chloride, abstract, 200
 - , novel, validation of, chemical mutagens and carcinogens, 305
- Sister chromatid exchanges, and chromosome aberrations, abstract, 164
- , effects of carcinogens on frequency of, in cultured human lymphocytes, 375
 - , evidence for hybrid DNA in formation of, abstract, 143
 - , in patients treated with psoralen plus UV, abstract, 228
 - , techniques, for cytological detection of damage, abstract, 205
 - , in xeroderma pigmentosum cells, following UV exposure, abstract, 163
- Skin, cancers, in xeroderma pigmentosum, and decreased DNA repair activity, abstract, 161
- , fibroblasts, from patients with Cockayne syndrome, UV-sensitivity, abstract, 162
 - , homogenates of, from pregnant rats, metabolism of carcinogens to mutagens, 325
- Smoke condensate, of cigarette, Swain fraction 5 of, as test substance, metabolism of carcinogens to mutagens in rats, 325
- Society, European Environmental Mutagen, abstracts of papers, 185
- Sodium arsenite, in Chinese hamster cell line Dede, abstract, 234
- Sodium azide, effectiveness and efficiency of, versus ethyl methanesulphonate in maize, 285
- Somatic mutation, detection of, in Chinese hamster, 403
- , in maize by treatment of seeds differing in metabolic state and cell population, 285
- Specific-locus, mutations, in male mice, pro-carbazine-induced, abstract, 218
- Spermatogenic, cells, of mouse, unscheduled DNA synthesis by chemical mutagens, abstract, 210
- Spontaneous, meiotic nondisjunction, in mouse oocytes, abstract, 209
- , mutation rates, and low level mutagenesis, abstract, 196
 - , —, in man, abstract, 199
- Spot, test, mammalian, sensitivity of, abstract, 202

Sterigmatocystin, activation by human liver enzymes, 387

Strains, of *E. coli rec⁻*, for testing of carcinogenic substances, 53

—, exceptional, in complementation group A in xeroderma pigmentosum, abstract, 163

—, of *S. typhimurium*, of Ames, testing of carcinogenic substances, 53

Structure, chemical, relationship between, and mutagenic activity, in some pesticides, abstract, 243

Supercoils, in nuclear DNA, and repair of radiation damage, abstract, 111

SV40, infection, characterization of azaguanine-resistant Chinese hamster cell mutants after, abstract, 239

Swain fraction 5, of cigarette smoke condensate, as test substance, metabolism of carcinogens to mutagens in rats, 325

Syndrome, of Bloom, contribution to study of, abstract, 121

—, Down's, repair of UV-induced DNA lesions in peripheral lymphocytes, abstract, 133

Synergism, between mitomycin C and caffeine, in human fibroblasts, abstract, 219

Synthesis, of DNA, testicular, inhibition of, by chemical mutagens and carcinogens, 305

System, tests, of screening, activity of chloroethylenes analysed by, abstract, 214

Techniques, of sister chromatid exchange, for cytological detection of damage, abstract, 205

Temperature-sensitive, Chinese hamster cells, UV-induced reversion of, abstract, 142

Testicular, DNA synthesis, inhibition of, by chemical mutagens and carcinogens, 305

Testing, of carcinogenic substances, use of *rec⁻* bacteria, 53

—, of chemicals in vitro, after in vivo activation in mammals, abstract, 202

—, for environmental mutagens, perspective for studies in 'comparative mutagenesis', 245

—, of furylfuramide, by using alanine-requiring mouse cells, 355

—, of inducible mutagenic DNA synthesis, use of viral DNA as substrate for, abstract, 149

—, of mutagenicity, in *Drosophila*, comparison of methods, abstract, 212

—, —, of herbicides with a haploid *Pelargonium*, abstract, 232

—, —, male meiotic and postmeiotic studies, abstract, 207

Testing, (continued)

—, procedure, used in GDR testing system, exemplified by divaskan, abstract, 235

—, system, of the GDR, procedure exemplified by divaskan, abstract, 235

—, of urine, from vinylchloride-treated rats, Salmonella test system, abstract, 230

—, of vertebrates, by scoring behavioural traits, abstract, 235

Testis, of mouse, radiosensitivities of DNA molecules, abstract, 145

Tests, of carcinogen, short-term, Salmonella mutation assay and cell transformation, abstract, 204

—, fluctuation, for detecting environmental mutagens in *S. cerevisiae*, abstract, 213

—, —, for mutagenicity, abstract, 220

—, —, use of yeast cultures for detection of environmental mutagens, 165

—, liver microsome, mutagenicity of chrysene, abstract, 209

—, micronucleus, and chromosome examination, comparison of, in detecting potential mutagens, abstract, 240

—, of mutagenicity, of Ames, carcinogen activation by human liver enzymes, 387

—, of screening system, activity of chloroethylenes, abstract, 214

—, short-term, evaluating adverse biological effects of vinylchloride, abstract, 200

—, —, novel, validation of, chemical mutagens, and carcinogens, 305

—, spot, mammalian, sensitivity of, abstract, 202

—, systems, different, comparative mutagenicity studies, with nitrosoureas, abstract, 225

—, —, of *Neurospora crassa*, increase of meiotic nondisjunction by *p*-fluorophenylalanine, 345

—, —, of Salmonella, of Ames, effects of diet on conversion of aflatoxin B₁ to bacterial mutagens by rats, 313

—, —, testing of urine from vinylchloride-treated rats, abstract, 230

12-*O*-Tetradecanoyl-13-acetate, effect in bacteria on chemical mutagenesis, abstract, 238

Therapy, cytostatic, dose-effect relationships in children with leukemia, abstract, 225

Thioacetamide, testing in *S. typhimurium*, 53

6-Thioguanine-resistant, mutants, induced in Chinese hamster cells by mouse liver microsome-activated dimethylnitrosamine, 365

- Thiomersal, use of yeast cultures and fluctuation test, 165
- Thuricide, letter to editor, 385
- , responses of root meristems to exotoxin, constituent of, 19
- Thuringiensin A, cytogenetic hazards, 19
- Thymine dimer excision, defect in, in extracts of xeroderma pigmentosum cells, abstract, 118
- Tissues, foetal, of pregnant rat, metabolism of carcinogens to mutagens, 325
- 4-O-Tolylazo-O-toluidine, testing in *S. typhimurium*, 53
- Tordon, in *A. nidulans*, 395
- Toxicology, viewpoint of, dose—effect relationships, abstract, 198
- TPA, effect on chemical mutagenesis in bacteria, abstract, 238
- Transformation, of cell, in vitro, and *Salmonella* mutation assay, as short-term carcinogen tests, abstract, 204
- , morphological, in hamster embryonic cells, treated with potassium dichromate, in vitro, 87
- Trenimon, karyotype anomalies in Chinese hamster embryos, 77
- Triethylenemelamine, cytogenetic basis of dominant-lethal mutations in mice, abstract, 230
- 4,5',8-Trimethylpsoralen, in Chinese hamster cells, abstract, 140
- Tumour, cells, ascites, of mouse, influence of mode of administration of mutagens on aberration frequency, abstract, 242
- , —, Ehrlich ascites, clastogenic activity of 1,4-dinitrosopiperazine, abstract, 220
- Unscheduled, DNA synthesis, by chemical mutagens, in spermatogenic mouse cells, abstract, 210
- Urine, testing, from vinylchloride-treated rats, *Salmonella* test system, abstract, 230
- UV-endoDNase, selective DNA-ethidium fluorescence and DNA-polyacrylamide gel electrophoresis, for studies of, abstract, 127
- Validation, of novel short-term test, chemical mutagens and carcinogens, 305
- Variability, genetic, in a bacterial population, abstract, 238
- Vertebrates, testing by scoring behavioural traits, abstract, 235
- Vicia faba*, root tips, induction of chromosomal abnormalities by inhalational anaesthetics, 177
- Vinylchloride, adverse biological effects in short-term tests, abstract, 200
- , testing of urine of rats, abstract, 230
- Viral, DNA, use of, as substrate to test inducible mutagenic DNA synthesis, abstract, 149
- Virus, of animal, mutagenesis by, abstract, 239
- , *Herpes simplex*, UV-irradiated, decreased host-cell reactivation of, and excision repair in xeroderma pigmentosum, abstract, 160
- Water, drinking, treatment of lead acetate in, of monkeys, abstract, 206
- WI-38, chromosomal effects of carcinogens and non-carcinogens, 297
- Workshop, International, Second, abstracts of papers presented at, DNA repair mechanisms in mammalian cells, 95
- , on mutagenesis and predictive carcinogenesis, 1977, 409
- Xeroderma pigmentosum, aberrations in cultured fibroblasts, abstract, 146
- , cells, defect in thymine dimer excision in extracts of, abstract, 118
- , —, deficient repair after γ -irradiation, abstract, 142
- , —, sister chromatid exchanges, following UV exposure, abstract, 163
- , —, UV and chemical carcinogens, abstract, 139
- , —, UV-induced endonucleolytic activity, abstract, 116
- , cell strains, synergism between mitomycin C and caffeine, abstract, 219
- , γ -ray analogue of, ataxia telangiectasia, abstract, 148
- , decreased DNA repair activity, and skin cancers in, abstract, 161
- , decreased host-cell reactivation of UV-irradiated *Herpes simplex* virus, and excision repair in, abstract, 160
- , exceptional strain in complementation group A, abstract, 163
- , levels of DNA polymerases α and β , in fibroblasts, abstract, 108
- , pathologic ageing of nervous system, and repair defects, abstract, 105
- , repair of DNA cross-links, impairment in Fanconi's anaemia, abstract, 152
- Yeast, cultures, use of, for detection of environmental mutagens, 165
- , ethidium bromide mutagenesis in; modulation by growth medium components, 269
- Zea mays*, mutagenic effectiveness and efficiency of sodium azide versus ethyl methanesulphonate, 285
